Facts and figures for those that
wish to write about us.

A bold statement

Axiance was built around **inclusiveness, sustainability** and **transparency**.

The financial sector wasn't.

Company overview

Axiance is a multi-asset brokerage firm dedicated to ethical trading practices, with a mission to make socially responsible investing accessible to retail and institutional clients.

The strategic shift to a multi-asset model and institutional trading makes Axiance a modern-day broker for driven traders. Its dedicated people and growing team of experts share their skills and resources to deliver top-tier trading technology and a rich pool of asset classes.

As a broker with transparency and sustainability at its heart and soul, Axiance focuses on providing financial instruments that hit metrics which matter to forward-thinking investors and reflect their values in a smart, cost efficient and fully transparent and fair trading environment.

This commitment is underpinned by strict compliance and socially responsible operations and ESG compliance which create value and responsibility towards our staff and integrity as a business towards our clients.

Culture

Our company is cultivating an environment of fairness and transparency. These principles govern how we communicate and how we treat you and our employees. We make sure that the service we provide to you is fair and offer complete visibility for cost.

Axiance invests in its people through organisational and governance change, with more training and development options for upskilling and empowering employees. We take pride in caring for our own before taking care of business. We have geared our company towards zero carbon emissions, and are very close to it with solar-powered and energy-efficient facilities.

As part of this effort, Axiance is committed to RE100, the global corporate renewable energy initiative for 100% renewable electricity globally.

“

We aim to become a leading multi asset brokerage and at some point an asset management type firm, covering both retail and institutional clients with a global coverage through selective licenses in different jurisdictions.

- *Panikos Teklos, CEO.*

”

We look to potentially follow the example of other brokerages, like achieving a listing...we're aiming high! But that is a journey that will be developed on very core fundamental principles of, to put it plainly, "doing things right".

- *Panikos Teklos, CEO.*
